

# LOVE YOUR HOME

JADE

# BRITISH MADE

We offer a vast range of British produced, bespoke products including a variety of next generation windows and doors. Quality comes first with JADE and we are going to tell you exactly why we are proud to be British manufacturers.

## MANUFACTURING

Our products are both fabricated and designed in Britain, thus making the supply chain shorter and more translucent. This allows our customers to directly work with us, if any adjustments need to be made to their order, gaining a more personalised experience and can subsequently expect much quicker turnarounds.

## QUALITY

At JADE, we have control over all stages of production undertaking regular quality checks to ensure that each product is finished to the same high standard. Our customers have a peace of mind knowing that their products are of the highest possible quality and have been made with the utmost attention to detail.

## SUPPORTING BRITISH ECONOMY

Buying British made goods from small businesses is the backbone of the UK economy, driving growth and creating jobs therefore vital for our countries survival.

At JADE, we are proud to say that our windows and doors are British made in our very own factory in Batley, West Yorkshire!

# JADE WINDOW & DOOR SPECIALISTS

Stunningly and naturally, glass has the ability to connect the outdoors with the indoors, allowing light to transform a room making it appear larger, brighter and most importantly, a space you love.

Established for almost a quarter of a century, JADE Window & Door Specialists is a family run business specialising in design, manufacturing and the installation of bespoke products including a variety of next generation windows, front doors, sliding doors, bi-folding doors and so forth. With aesthetics, security and performance at the core of our design process, all our products have been developed to deliver long-life, low-maintenance performance.

JADE has recently trebled its manufacturing capacity reflecting substantial business growth over the past few years. Our large factory, in Batley West Yorkshire, is where the manufacturing of Aluminium windows & doors and PVC windows & doors, takes place. All our products are bespoke, based on our customers' requirements with top security features. Throughout the UK we have completed thousands of installations from spectacular residential projects to simple installations replacing existing products with our own. No matter how large or small a project may seem, JADE can help create a space you will love!

# LOVE AT FIRST SIGHT

## WANTING TO TRANSFORM YOUR HOME WITH OUR STYLISH WINDOWS?

At JADE we have multiple window styles to choose from, whether it be windows to suit traditional properties and modern properties.

Did we mention all our styles come in a range of colours and sizes!? However large or small a project may seem, JADE is happy to help! No matter which window style is for you, you can expect our products will guarantee you quality, security and most importantly a spectacle you are proud of.

CASEMENT WINDOWS

# PVC WINDOW COLLECTION

## CASEMENT WINDOWS

Casement windows are our most popular design, with outwards opening panes hinged at the top or side. Our window systems can be used to make almost any size or shape of casement window, with a blend of fixed and opening panes to suit, giving your home a distinct look of quality on both modern and traditional homes alike.

## REVERSIBLE WINDOWS

Our revolutionary, fully Reversible window is the perfect solution for medium to high rise properties- or where access is limited. It combines outstanding thermal and weathering performance with an easy to

clean design. The window is hinged at the top and opens outwards for ventilation. The real luxury is that the window rotates, safely and easily, outside the building allowing cleaning from the inside.

# PVC WINDOW COLLECTION

## TILT & TURN WINDOWS

Tilt and turn windows are the ultimate in practical design. Their appearance is simple, clean and modern, inviting natural daylight into your home. Hinged along the base, they tilt inwards for ventilation and if you want to clean the outside glass, simply turn the handle again and the window becomes side-hinged and can open right into your room. Tilt and turn windows offer greater scope for larger openings than a traditional casement window and give greater thermal performance with the larger panes of glass. A perfect solution for high-level or hard-to-reach windows – or for anyone who hates climbing ladders!

## FLUSH TILT & TURN WINDOWS

Flush tilt and turn has the exact same functionality as the tilt and turn window, however its appearance differs offering an ultra-modern, sleeker appearance competing against a more expensive aluminium alternative. This window style will do nothing but amaze those passing by through creating a stylish, modern spectacle.

FLUSH TILT & TURN

TILT & TURN

Spectus are a long standing partner of JADE, who supply us with their Elite 7 uPVC profiles.

# WHY PVC?

## STRONG YET LIGHT

PVC windows are lightweight in character facilitating easy and effortless operation. Vinyl- as a material is incredibly durable, having anti-corrosive and chemical and moisture resistant properties. Furthermore, the high durability of vinyl additionally gives the windows excellent weather resistance, withstanding a variety of temperature conditions.

## MAINTENANCE

Low maintenance is what every individual needs! Unlike Timber windows, which require regular, costly maintenance, PVC windows only need a routine dusting or wiping down.

## TOP SECURITY

All our products are secured by design: a nationally recognised standard devised by the police giving you extra comfort and security. Additionally, at JADE, we go the extra mile by having all of our products annually, third party security tested, providing that extra peace of mind for our customers.

## ANY COLOUR

At JADE, we offer a wide range of colours. In fact, the options are limitless. With over 1500 RAL colours available, we can help you to create your dream home.

There are two ways to colour composite...

Foil wrapped- Foils are applied by a heat bonding process which fuses it to the surface of the PVC.

Spray Painted- As the name suggests, the colouring process is carried out by hand with an air assisted spray gun.

Our standard coloured PVC profiles are foil wrapped, however our bespoke products are spray painted in the colour of your choice.

Neither colouring techniques will affect the quality of the product.

## COST-EFFECTIVE

Our windows can achieve a fantastic band 'A+' window energy rating and will protect your home from draughts and leaks. PVC has great insulation properties that can contribute to the energy efficiency of your home.

Additionally, it is a common fact that PVC is more economical than other materials available on the market i.e. aluminium and timber.

## FINISH

Various finishes are available including the smooth traditional PVC look or the wood grain effect.

# ALUMINIUM WINDOW COLLECTION

Wanting to create a distinct stylish look that is built to last? Our Aluminium windows are strong and versatile, suiting both modern and traditional homes and are manufactured to the same high standard as all of our products. This chic slim line look will create a stunning visual impact for years to come.

JADE manufactures aluminium windows with Smart's Alitherm 600 range of profiles.

## ALUMINIUM CASEMENT WINDOWS

Aluminium casement windows are perfect if you're searching for a strong, durable window solution that is aesthetically pleasing, constructed from light material and boasts a slim frame design. They give properties a distinct look of quality and are suited on both modern and traditional properties. Their practicality guarantees they endure the elements and the test of time, with little maintenance needed.

## WHY ALUMINIUM?

### STRONG YET LIGHT

Aluminium is a low-density metal, yet extremely durable allowing windows to effortlessly open and close, creating a slender more modern appearance.

Additionally, larger openings are available due to the natural strength of aluminium, allowing light to flood into your home.

### ENERGY EFFICIENT

Unlike other material choices available on the market, aluminium does not contract or expand in the heat or cold weather, ensuring your home stays both energy efficient and secure.

### FINISH

JADE's aluminium windows come with a mill finish, the natural texture of metal.

### ANY COLOUR

Looking for something unique? We have over 1500 RAL colours to choose from. At JADE all of our aluminium products are powder coated, making our items more resistant to chipping, scratching, fading and wearing than other finishes.

ALUMINIUM CASEMENT WINDOW

### THE PROCESS

1. The powder coating process starts with the metal components being cleaned, which helps the coating to adhere to the metal. This process is carried out in a multi-stage immersion water tank system.
2. Next a non chromate bonder is applied to help the powder adhere to the aluminium.
3. Finally a drying oven is used to ensure no moisture is present when the items are powder coated.
4. The components are then suspended from a jig and passed through a spray booth where the powder is applied by spray guns.
5. Once the powder has been applied it is passed through a curing oven where the particles melt and fuse together and adhere to the components surface.

### BESPOKE

Aluminium windows are made to measure, giving you the flexibility to create a space you will love.

# THE BIRKENSHAW BEAUTY

Home extensions are becoming extremely popular, with many home owners seeking to create a dynamic, multifunctional space for the whole family. This stunning design offers a contemporary and contrasting aesthetic, which will be achieved on any building, whether it be a converted barn, a retro 70's build, or a beautiful Georgian home.

This home in Birkenshaw shows how effective a contrasting, contemporary extension can be. The visuals of the property are highly impressive, equally matched by the breath-taking interior design. The intention of this design was to be a multi-purpose, open planned living space ideal for watching children, entertaining guests and inviting the outdoors in. The customer has achieved just that!

'JADE supplied and fitted all windows and doors at our new property. They were extremely professional and reliable. I would highly recommend to anyone looking to have new windows and doors fitted.'

Mrs Rushworth

# OUR DOORS

REVOLUTIONALIZE YOUR HOME WITH OUR VERSATILE DOORS... THE OPTIONS ARE LIMITLESS!

At JADE, we have a variety of next generation door styles, materials and colours for you to choose from that are custom made in our very own factory. Our door range consists of:

- Composite Doors
- PVC Entrance Doors
- PVC French Doors
- PVC Sliding Patio Doors
- Aluminium Bi-Folding Doors

All of our ranges will not only transform the look of your home, but will remain practical and most importantly, secure.

'We had a new composite door fitted and also a broken window replaced - very professional and friendly - would highly recommend!'

Mr Battye

# COMPOSITE DOOR COLLECTION

Entrance Doors act as a focal point, creating lasting impressions. This is why we take a design-led approach to ensure our products meet our customers' expectations in terms of quality, appearance and security. Our Composite Door collection of beautiful traditional and contemporary front doors is engineered to deliver extraordinary strength and performance. Every door is made from the best materials and excellent standards of design and construction – every product in our range is guaranteed to enhance your home.

**Did you know?**

To give great definition and long life performance JADE's composite doors use glass reinforced plastic skins. That's the same material used to make the hulls of boats!

# WHY CHOOSE COMPOSITE?

## COST EFFECTIVE

Composite doors have incredible heat insulation properties and are around 6 times more insulating than wooden doors. If you desire a cosy warm house, low bills and a reduced carbon footprint, a composite door is for you.

## LOW MAINTENANCE

Traditional wooden doors bring the commitment to continuously sand, weather seal and re-varnish to maintain that stunning finish. With composite doors you can effortlessly achieve the look of a beautiful timber door, without the conservation due to the variety of materials used to compose the product itself and as a result, our doors will not fade or discolour.

## CHOICE OF MATERIAL

Similarly, PVC and Timber doors are made from one singular material and consequently, have multiple pros and cons. Composite doors however are made from a mixture of the best materials taking the finest qualities from the other doors available on the market, merging them together. The blend of materials ensures great strength, attractive design, high level of security and durability. Some of the materials include a steel reinforced frame, a solid styrofoam core, topped with a thermo plastic skin.

### TOP SECURITY

Our composite doors are secured by design, a nationally recognised standard, devised by police officers, giving you extra comfort and security. Additionally, composite doors come with multi-point locking system heightening security.

At JADE, we go that little bit further. All of our products are annually safety tested by a third party, guaranteeing our customers top quality windows and doors.

### ANY COLOUR

There are two ways to colour composite:

**FOIL WRAPPED** - Foils are applied by a heat bonding process which fuses it to the surface of the PVC.

**SPRAY PAINTED** - As the name suggests, the colouring process is carried out by hand with an air assisted spray gun.

Our composite doors come in 12 standard colours which are foil wrapped, however our bespoke products are spray painted in any RAL colour of your choice. Over 1500 colour choices!

Neither colouring techniques will affect the quality of the product.

### FEATURES OF OUR COMPOSITE DOORS

- ▶ Secure by Design
- ▶ Over 1625 RAL colours available
- ▶ Suitable for both Double & Triple glazing
- ▶ Ideal for front or back doors
- ▶ Outward or inward opening
- ▶ Internally beaded for enhanced security

Secured by Design

Police Preferred Specification

# AN ENTRANCE TO REMEMBER

Long gone are the 1920's and 1930's where entrances to homes were made discreet and simple to avoid people looking into your home. Nowadays, homeowners seek to make positive first impressions! As they say, you never get a second chance to make a first impression.

Your front door is the first thing guests see. Creating an eye-catching entrance will enhance the attractiveness of your home. When you choose the right door and make an investment in one that expresses the style and design of your home, it can increase the value of your entire property.

Even down to the choice of colour gives guests, subconsciously, an indication of the type of home owner you are. Psychologists use colour as a way of analysing and identifying key personality types. Generally, most people are likely to select one of their favourite shades on the entrance to their homes, due to it being the first thing they see.

## WHITE

People who often choose white are organised and logical and don't have a great deal of clutter in their lives.

## RED

Those who love red live life to the fullest and are tenacious and determined on their endeavours.

GEORGIAN DOORS, DUBLIN

10 DOWNING STREET, LONDON

### BLUE

If blue is the chosen colour, it indicates harmony and the individual is reliable, sensitive and thinks of others.

### GREEN

Individuals who are often affectionate, loyal and frank.

### PURPLE

Artistic, unique individuals who have great respect for people but at times can be arrogant.

If, on the other hand, you are wanting to come across as significant yet serious, then take inspiration from Britain's most famous front door, 10 Downing Street and opt for black!

NOTTING HILL DOOR, LONDON

# PVC ENTRANCE DOOR COLLECTION

Wanting to make a statement but in need of a cost-effective solution? Greet guests with one of our expertly crafted, high security PVC doors. Our collection of doors are produced to the highest standard using top quality raw materials and are available in a wide range of styles, designs and features.

All our doors are manufactured in our very own factory providing the highest standards to guarantee you an entrance you will love!

# PVC FRENCH DOORS COLLECTION

French Doors transform the look of your home adding style, elegance and character to your property. This door style is completely versatile suiting both traditional homes with georgian bars and more contemporary homes with bold frames and modern ironmongery. This simple yet effective choice of door is guaranteed to revamp your home, creating a haven you will love.

# PVC SLIDING PATIO DOORS

Our enhanced security sliding patio doors create elegant, bright spaces enabling you to maximise your space for entertaining & living purposes. Sliding doors are the perfect solution for saving space when it comes to accessing the outdoors, making them ideal for balconies, patios and garden areas. The larger the frames the greater the access to the outdoors. This simple yet effective choice of door is guaranteed to transform your home creating a space you will love.

# WHY PVC?

## STRONG YET LIGHT

Like our PVC windows, our PVC doors lightweight property ensures a straightforward and effortless operation. Vinyl (PVC) is incredibly durable, remaining strong and sturdy for years to come, unlike many traditional materials. Additionally, PVC is extremely resistant to weather conditions and won't yellow or change colour for the duration of its lifetime.

## MAINTENANCE

PVC doors are considerably easy to maintain. To freshen up your PVC products all it takes is a simple wipe down as its material will not rot or rust. With PVC you will never require another coat of paint or sand down unlike timber doors. Low maintenance is what every individual needs!

## TOP SECURITY

Our PVC doors are Secured by design! If anyone knows about security, it's the police. Our Secured by Design meets their national standard for safer homes. Its not

only Police-approved – its recognised by many insurance companies. So, as well as enjoying an added sense of safety, you could get a discount on your home insurance too.

Additionally, at JADE, we go the extra mile by having all of our products annually, third party security tested, providing that extra peace of mind for our customers.

## ANY COLOUR

Looking for something unique? We offer an extensive range of colours. In fact any colour your heart desires! From striking shades of bronze through brilliant reds and pastel blues to traditional white– with practically every colour in between.

## COST-EFFECTIVE

PVC has great insulation properties and PVC door panels can contribute to the energy efficiency of a building.

## FEATURES OF OUR PVC DOORS

- ▶ Secure by Design
- ▶ Over 1625 RAL colours available
- ▶ Suitable for both Double & Triple glazing
- ▶ Ideal for front or back doors
- ▶ Outward or inward opening
- ▶ Internally beaded for enhanced security

# ALUMINIUM BI-FOLDING DOORS

Bi-Folding doors elegantly connect the outdoors with the indoors, allowing light to fill the room making it feel larger, brighter and simply stunning. With aesthetics, security and performance at the core of our design process, all our door systems have been developed to deliver long-life, low-maintenance performance. Due to integrating our thermal barrier technology, each door also provides great energy efficiency – giving you lesser energy charges for years to come. Our bespoke bi-folding doors are a perfect choice for both old and new homes.

## WHY ALUMINIUM?

### STRONG YET LIGHT

Strength is one of the most important factors when it comes to choosing bi-folding doors. The frames have to support huge panes of glass, and be durable enough to withstand constant use and bad weather.

Aluminium is comparatively stronger than timber and PVC and can therefore support more glass on thinner frames. This allows you to keep framework to a minimum, leaving views unobstructed while letting light in.

### ENERGY EFFICIENT

Aluminium bi-folds contain Polyamide thermal barrier technology to help keep rooms warm in the winter, subsequently reducing energy bills. In addition, a number of threshold options are also available to give further-improved weather performance.

### ANY COLOUR

Available in any RAL or British Standard colour, Visofold bi-fold doors are polyester powder-coated for durability to maintain a fresh appearance, year after year. There is also the option of dual colour, allowing you to choose different shades for the interior and exterior of the door, as well as real wood and metallic finishes.

### TOP SECURITY

Not only are our bi-folding doors Secure By Design, but high-security multi-point locking mechanisms are fitted on opening sashes, with shoot-bolt locking and internally glazed sealed units for added assurance.

## FEATURES OF OUR BI-FOLDING DOORS

- ▶ Secure by Design
- ▶ Over 1625 RAL colours available
- ▶ Smart-Wall Visofold system
- ▶ Thermally broken for better U-Value ratings of 1.8
- ▶ A variety of opening styles
- ▶ A variety of sizes from 1000mm to 8400mm

# ATTENTION TO DETAIL

It's all in the detail! From glass patterns, door knockers, letter box, hinges, handles the list continues! We have a wide variety of accessories to choose from and can cater to your every need! Whether your goal is for your property to look modern, therefore opting for clear glass and a tear drop handle to give it a minimal yet bold appearance, or perhaps a more traditional appearance selecting a more detailed glass pattern and monkey tail handle—just speak to us if you need anything unusual or for advice and we will find you the perfect solution.

# 5 WAYS TO CREATE THE ILLUSION OF A LARGER SPACE

When people view homes a key factor when buying a property is the space that comes with it! Unfortunately, not every property is blessed with a wealth of space. In a small space everything counts from accessories, to colour choices, to natural light. This article will give you 5 key pointers to help optimise your space!

## 1. MIRRORS

The key to creating the illusion of a larger space is light! Mirrors are a basic home accessory however have more purpose than just being a statement piece. Placing a mirror in the correct location allows you to optimise natural light. The best place for this would usually be adjacent to a window or a glass filled external door, the light subsequently bounces throughout the room adding depth.

## 2. PAINT

The choice of colour when painting a small room plays a major role when it comes to creating the illusion of a larger space. When we paint rooms in lighter colours they become more reflective, making your space feel open and airy. Dark colours, on the other hand, tend to absorb the light making a room look and feel smaller.

### 3. DE-CLUTTER!

Simple... keep your room tidy and organised! There is nothing worse than being in a small space feeling cramped due to clutter accumulated over the years. To sum it up, a cluttered room equals a smaller room. When decorating a space limit the number of accessories and have a focal point, whether it be a bed in a bedroom, a dining table, TV and so forth. Another thing you may want to consider: is instead of having multiple pictures in a room perhaps have one larger picture.

### 4. WINDOWS AND DOORS

The key to inviting the natural light into your space is through large windows or glazed doors elegantly connecting your space with the outdoors, making it feel larger, brighter and simply stunning no longer limiting your space!

### 5. LIGHTING

We all have those darker corners in our homes! The simple way to brighten up these spaces is to add a gorgeous lamp. Practical and a pretty accessory to enhance your space and most importantly it will add more depth to the room!

# SEE FOR YOURSELF!

There is no better way to see our windows and doors than in person. Come visit our new showroom in Batley where you can take a look at our latest products from aluminium bi-folding doors, PVC windows and doors, composite doors, glass patterns, ironmongery and so much more.
