

LOVE YOUR SCHOOL

JADE

BRITISH MADE

We offer a vast range of British produced, bespoke products including a variety of next generation windows and doors. Quality comes first with JADE and we are going to tell you exactly why we are proud to be British manufacturers.

MANUFACTURING

Our products are both fabricated and designed in Britain, thus making the supply chain shorter and more translucent. This allows our customers to directly work with us gaining a more personalised experience and can subsequently expect much quicker turnarounds.

QUALITY

At JADE, we have control over all stages of production undertaking regular quality checks to ensure that each product is finished to the same high standard. Additionally, we are PAS24 compliant and 3rd party audited fabricators, meaning we fabricate in compliance with B56375-1:2015 to ensure the highest standards that window and door manufacturing are adhered to. Our customers have a peace of mind knowing that their products are of the highest possible quality and have been made with the utmost attention to detail.

SUPPORTING BRITISH ECONOMY

Buying British made goods from small businesses are the backbone to the UK economy, driving growth and creating jobs therefore vital for our country's survival.

At JADE, we are proud to say that our windows and doors are British made in our very own factory in Batley, West Yorkshire!

OUR PRODUCT RANGE

We offer a vast range of bespoke products including a variety of next generation windows and doors.

Over the years we have discovered that the majority of school's priorities have consisted of the following;

- Security
- Low maintenance
- Aesthetics
- Long life Performance

These features are at the core of our design process, guaranteeing to leave our customers satisfied and with products that will last for generations to come.

"The physical environment of a school is a significant factor in the overall health and safety of students, staff and visitors. It is crucial for School buildings to be designed and maintained to be free of health and safety hazards and to promote learning. It has been proven by the department of education that student achievement can be affected either positively or negatively by a school's environment. At JADE, we strive to provide our clients with the best products available on the market, aiming to help create that positive learning environment for children throughout Yorkshire."

Ryan Fozard - Director at JADE

OUR WINDOWS

Spoilt for choice! At JADE, we have multiple window styles to choose from:

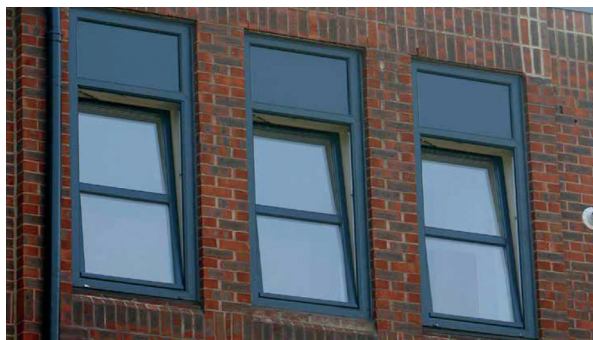

PVC CASEMENT WINDOW

Casement windows are our most popular design, with outwards opening panes hinged at the top or side. Our window systems can be used to make almost any size or shape of casement window, with a blend of fixed and opening panes to suit, giving your home a distinct look of quality on both modern and traditional homes alike.

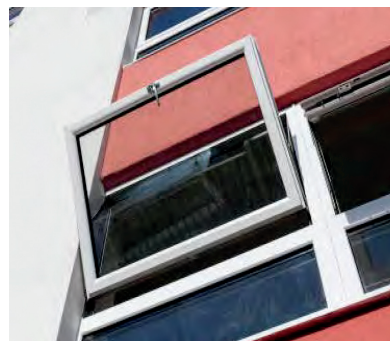

PVC FLUSH TILT & TURN WINDOW

Flush tilt and turn is a revolutionary new window with its sleek flush design, providing an ultra-modern look and feel. Their slim line appearance is simple, clean and modern and offers two opening positions – a tilt mode and a turn mode. The tilt mode offers secure ventilation, an improve factor in ground floor installations; and the turn mode enables cleaning of the window to be carried out without risk. Practicality aside, It has been specifically designed to give a more 'flush' appearance and compete against more expensive aluminium alternative. This window style will do nothing but amaze those passing by through creating a stylish, modern spectacle.

PVC REVERSIBLE WINDOW

Our revolutionary, fully reversible window is the perfect solution for medium to high rise properties – or where access is limited. It combines outstanding thermal and weathering performance with an easy to clean design. The window is hinged at the top, opens outwards for ventilation, and can be rotated in order for the outer surface to be cleaned from indoors. The real luxury is that the window rotates, safely and easily, outside the building, so there are no worries about snagging on curtains or blinds. Slimline profiles allow masses of light into your home and the simple line of the deep bevelled frame perfectly complements contemporary décor.

ALUMINIUM CASEMENT WINDOW

Aluminium casement windows are perfect if you're searching for a strong, durable window solution that is aesthetically pleasing. They give school's a distinct look of quality and are suited on both modern and traditional buildings. Their practicality guarantees they endure the elements and the test of time, with little maintenance needed. Additionally, larger openings are available due to the natural strength of aluminium.

OUR DOORS

ALUMINIUM DOORS

Our aluminium doors are the ideal solution for high traffic entrance doors for commercial & public buildings. All our doors are hand crafted to ensure that our doors meet your every expectation in terms of quality, appearance and most importantly, security.

We offer a wide range of ironmongery options from standard PAD handles to architectural pole handles. Our commercial door systems can link to your intercom & entry systems making access control easier to manage.

PVC DOORS

Our PVC doors are perfect for schools who may have a limited budget, however only for infrequently used doors i.e. storage room, secondary entrance door, gardening room and so forth.

PANIC PADS

Emergency panic pads are designed for applications where a final exit door is to be used by members of the public that have no prior knowledge of the device and a panic situation is likely to occur in the event of an emergency.

TOO MANY KEYS?

Suited cylinders offer the most flexible method of controlling access to a building with multiple cylinder locks and multiple staff. One key fits all!

CASTLEFORD ACADEMY

MILTON SPECIAL SCHOOL

COLOURED ALUMINIUM AND PVC

JADE provides over 1625 RAL colour options to complement your school's colour scheme. We can offer coloured panels or coloured window frames or both. With a diverse range of colours to choose from, we provide that extra special individual touch to every school we renovate.

design advice.

SOLAR GLAZING

In many public buildings, especially schools, Solar Glazing is used to ensure rooms are comfortable during warmer months. There are various options available: The glass can either reflect the heat from entering the building or absorb the heat; either way students stay protected from harmful UV rays and dangerous heat.

ANTI-SUN TINT

Tint can be used for visual appeal, to reduce glare or where a degree of solar control performance is required. It may be used for exterior and interior applications. The tint is available in a choice of colours; green, bronze, grey, clear and blue. Tint is often opted in classrooms where the student's learning may be affected whether it be a south facing classroom, therefore the sun will directly entering the room or an I.T room where the sun may come in contact with the monitors.

OTHER SOLAR GLASS

Whilst anti-sun is the most popular and cost effective solar glass, there are many other products available on the market. The majority of other options consists of clear glass with no tint, in comparison to the anti sun and come in a variety of strengths which can be adapted to your schools needs.

A PERFECT MIX!

It is a known fact that PVC is a more economical material as opposed to Aluminium. PVC windows provide a durable, maintenance free and cost-effective solution and is proven to be the most popular choice of material when it comes to refurbishing school's due to this factor. Aluminium doors, however are highly recommended over PVC doors due to their added strength and design to withstand the high volume of traffic, especially in schools and other public buildings. When strict budgets come in to play, PVC windows with Aluminium doors are the perfect combination to provide you with products that will last you years to come!

WESTCOT PRIMARY SCHOOL

ARCHED WINDOWS

This Victorian school features impressive arched windows, of which JADE has extensive experience manufacturing. Rest-assured unique characteristics and period design of your building will not be lost. We arrange all necessary scaffolding needed to install your new windows to ensure safe and quality completion.

CURTAIN WALLING

Curtain walling is a large screen of windows that allows natural light to flood into the building. PVC frames are joined together to form a strong and impressive wall of glass.

JADE provided curtain walling to this local Academy, offering an economical alternative to aluminium windows.

Curtain walling is available for long expanses in PVC and is perfect for both ground floor and first floor. Our robust and reliable curtain walling system has been installed in homes, schools, healthcare facilities and all sorts of commercial building.

CROFTON ACADEMY

CASTLEFORD ACADEMY

'I am most impressed with the individual care and effort shown by JADE who understood our concerns and goals, delivering their services on time. I am also very pleased with their professionalism and the outstanding quality of the products. Would highly recommend!'

Tina Horsey, Templenewsam Halton Primary School

SECURED BY DESIGN

If anyone knows about security, it's the police! Our Secured by Design meets their national standard for safer homes. Its not only Police-approved – its recognised by many insurance companies.

Additionally, at JADE, we go the extra mile by having all of our products annually, third party security tested, providing that extra peace of mind for our customers.
